

Skin Sanitizing, Body Wash, and Fabric Coatings

Part of MicroArmor's three pronged approach is the elimination and on going protection of the skin and clothing against fugitive microbials. All of our skin sanitizers are FDA compliant and are derived from plant based materials.

Our sanitizers are plant derived and are non-alcohol based. They kill up to 99.9999% of bacteria, viruses, and fungi that can cause diseases. Our exclusive non-alcohol blend is more effective, and less money per application than alcohol based products. With repeated use, our sanitizers actually improve the condition of your skin.

MicroArmor's Athletic Body Wash utilizes the same base ingredient that our skin sanitizer has (BZK; same ingredient that's in Bactine). This antiseptic is infused into the soap along with the skin conditioners to bring you a quality soap that thoroughly cleans you skin...safely!

Cationic Coating: MicroArmor has the only cationic fabric coating on the market in the US. Our coating continually provides the athlete with 24 hour a day protection 7 days a week for up to 50 washes. This coating will eliminate odors that bacteria and fungus can cause.

Pricing

Discount: As members of the Ohio High School Wrestling Coaches Association you will receive a **10%** discount off of all the below listed prices. MicroArmor will also donate **10%** from each sale to the Wrestling Coaches Association. Additionally, MicroArmor will donate **5%** to the newly established OHSWCA/MicroArmor Scholarship Fund.
