

WRESTLING DISINFECTING PACKAGES

MicroArmor has developed a cost effective and comprehensive system to help protect your athletes from harmful exposures to diseases before, during, and while competing on the wrestling mat. Our approach includes the disinfectant / treatment of the mats on a regular basis, the coating of the equipment/uniforms/knee pads/shoes with our exclusive cationic coating that protects the athlete continuously when competing & practicing before, during and after the experience.

MicroArmor 3 Point System

Disinfect/Coat/ Wrestling Mats

Disinfect/Coat the mats on a regular basis to help protect against microbial exposures. MicroArmor uses an EPA approved, safe, hospital grade disinfectant to assist in eliminating harmful microbials. This product is non-toxic, non-corrosive, non-acid, and phosphate free.

Equipment Treatment

MicroArmor manufactures a cationic coating that when applied provides 24 hour protection, 7 days a week. This coating will remove the odors that are caused by bacteria/fungus. The coating is a safe, non-leaching, non-corrosive polymer that will last for up to 50 washes. Perfect for practice cloths, uniforms, knee pads, shoes, headgear, etc..

Skin Sanitizer Treatments

MicroArmor manufactures and distributes a non-alcohol based skin sanitizer that is 100% plant derived. This sanitizer will help to eliminate on contact MRSA, Staph, ring worm, impetigo, as well as many fungal species that can cause illness. Our formulation contains moisturizers that condition and improve your skin with repeated use. We also provide an athletic shower gel that contains an anti-microbial agent that contains moisturizers and is used when showering to assist in the reduction of microbials on the skin.
